President's Report

6/2 emailed Troy regarding the Zoning violations on Traverse Bay Rd & E. Main.

6/2 emailed Julie at Accunet and had Mike set up as Administrator on the Village Web Site.

6/9 DDA Meeting, Mike Serafin attended the meeting and shared with the board some of the department's equipment needs that they do not have the funds to purchase. The board approved the purchase of used compressor so the fire dept. can refill the oxygen tanks on site, so they no longer need to travel to do this task. Thank you DDA for your support.

Village received a message from Fran Ludington regarding the drain at 115 Alger, gave it to Warren.

7/2 received complaint from Lenny Bobbick regarding 2'tall weeds at his business. Spoke with Warren, he was having his helper take care of it.

I have been gathering information, so we can re-visit the funding of Fire Department. The one thing that we cannot do is ask for a millage, as Lincoln is included in the Gustin and Hawes Township Fire mileages.

I also received a "Thank You" for acknowledging the Beautification Committee & Danny Hale in the Alcona Review.

Road Report

6/22 the Barlow Rd Project started at Trask Lake, E. Main & Barlow Rds.

6/29 Received a phone call from Joe James regarding Barlow Rd. construction in front of the Bistro.

6/30 Spoke with Rebecca Rivard at Huron Engr., she was having one of her team contact Joe James regarding the Bistro. She also indicated that DTE has some power lines that still need to be moved in order to install proper drainage at E. Main & Barlow. I will a couple weeks before DTE gets a crew out to move the lines. With that said, Elmer's is now working on the county part of the road project.

Respectfully Submitted,

*Sheila*
